Appendix A: Curriculum Design & Assessment Plan

Functional Literacy & ESL Programme for Rural Women | Tikondane-Inspired Community Centre, Rural Zambia

Six 45-minute Sessions | Module Focus: Economic Communication — Market Trading, Banking & Financial Transactions

APPENDIX A — CURRICULUM PLAN: Functional Literacy & ESL Programme for Rural Women, Tikondane-Inspired Community Centre, Zambia						
Session	**ILO(s)**	**Bloom's Level**	**Content Themes**	**Activities & Resources**	**Assessment Method & Type**	**Criteria & Feedback**
SESSION 1 — Community Entry & Vocabulary Building						
1	LO1	Remembering (recall & recognise)	**Market Trading & ESL Vocabulary** • Chichewa market terms & their English equivalents • Oral naming of everyday produce, prices, transactions	**Ubuntu Name Circle (15 min)** • Learners introduce themselves and share a market word they know in Chichewa — builds communal trust (Bangura, 2005) **Freirean Picture Code Activity (20 min)** • Learners independently identify market vocabulary from visual flashcards of produce, coins, market stalls • Resources: Printed picture-code cards, blackboard **'Each One Teach One' Oral Drill (10 min)** • Peer-teaching: learners connect Chichewa terms to English equivalents through oral sentence practice (Bangura, 2005)	**Type: Formative / Diagnostic** Facilitator observation of prior knowledge activation during picture-code activity Oral verbal check: Can learners name 5+ market items in both languages?	• Breadth of bilingual vocabulary demonstrated • Willingness to share knowledge with peers *Feedback: Verbal facilitator feedback + peer affirmation within name circle*
SESSION 2 — Language Reinforcement Through Rhythm & Oral Practice						
2	LO1, LO2	Remembering → Understanding (recall & interpret)	**Communicative ESL + Pronunciation** • Polite requests, greetings, price negotiation phrases • Rhythm and gesture as memory anchors	**Co-Created Chant Building (25 min)** • Small groups co-construct bilingual chants for key phrases (e.g. 'How much is this? / Ndalama zingati?') • Gesture, clapping, and movement reinforce pronunciation (Bangura, 2005) **Group Performance (15 min)** • Groups perform chants for one another — peer reinforcement • Resources: Blackboard, learner-generated phrase lists	**Type: Formative** Facilitator listens for correct pronunciation and appropriate phrase use Peer observation during group chant performances	• Accuracy of bilingual phrase recall • Participation in co-creation process *Feedback: Group peer feedback after performances; facilitator verbal notes*
SESSION 3 — Authentic Market Role-Play (Assessed)						
3	LO1, LO2	Applying (use in new context)	**Communicative ESL & Market Trading** • Translanguaging in buyer-seller negotiation • Polite requests, politeness conventions, price communication	**Structured Market Role-Play (35 min)** • Pairs assigned as buyers/sellers; rotate roles • Visual cue cards (picture + price) support communication (Zondi & Mbatha, 2025) • Translanguaging actively encouraged — Chichewa bridges meaning; English develops proficiency **Peer Observation (10 min)** • Each learner observes one peer and notes one strength and one suggestion using a simple illustrated checklist	**Type: Formative / Authentic Assessment** Facilitator observation notes during role-play Peer observation checklist completed by each learner	• Translanguaging fluency and appropriateness over grammatical accuracy • Use of polite requests and greetings • Constructiveness of peer feedback *Feedback: Verbal facilitator feedback to group; written peer*

				• Resources: Visual cue cards, fake money/props, illustrated peer-observation checklist		*observation notes shared (Biggs & Tang, 2007)*
SESSION 4 — Banking Literacy Simulation (Practice, Not Assessed)						
4	LO3	Applying (functional knowledge)	**Bilingual Banking & Financial Literacy** • Reading & completing deposit/withdrawal slips • Interpreting simplified financial documents • Introduction to mobile banking (paper-based imitation)	**Paper-Based Banking Simulation (40 min)** • Learners complete mock deposit slips, tally sheets, and transaction records in small groups • Paper printouts mimicking banking apps used as literacy tools — not as technology practice (Trucano, 2014) • Facilitator circulates and supports; learners assist peers (each one, teach one) **Group Discussion (5 min)** • What did we find confusing? What felt familiar? • Resources: Mock banking forms, printed app screens, fake money, tally worksheets, pencils	**Type: Formative Practice (not formally assessed)** Facilitator observation: task completion accuracy with guided support Group discussion as informal knowledge check	• Ability to complete basic financial tasks with peer/facilitator support • Engagement and willingness to ask for help *Feedback: Facilitator observation notes; verbal praise and corrections during activity*
SESSION 5 — Community Market Simulation (Summative Assessment)						
5	LO2, LO3, LO4	Analysing → Evaluating (distinguish, judge, assess)	**All Content Themes Integrated** • Market trading + banking + communicative ESL converge in a single authentic task • Translanguaging as real-world communicative strategy	**Full Community Market Simulation (40 min)** • Learners operate market stalls, trade produce, complete tally sheets and transaction records • Buyers and sellers communicate using bilingual strategies (Zondi & Mbatha, 2025) • Ubuntu value: learners who finish early support peers still completing records **Peer Feedback (5 min)** • Each learner identifies one strength and one challenge observed in a peer's participation • Resources: Stall props, fake money, produce (real or printed), tally sheets, transaction records, pencils	**Type: Summative / Authentic Assessment** Convergence point for LO2, LO3 and LO4 Facilitator observation notes (structured checklist) Peer feedback using illustrated observation template	• Accurate financial record-keeping and transaction management • Effective bilingual communication during trading • Quality and constructiveness of peer feedback given • Ubuntu contribution: evidence of supporting peers during activity *Feedback: Facilitator observation notes shared verbally; peer observation templates retained as evidence (Biggs & Tang, 2007)*
SESSION 6 — Ubuntu Reflection Circle (Formative / Closing Assessment)						
6	LO4	Evaluating → Creating (reflect, judge, synthesise)	**Reflective Communication & Metacognition** • Sharing what was learned • Identifying personal and communal growth • Articulating challenges and strengths	**Ubuntu Reflection Circle (30 min)** • Seated in a circle, each learner shares: one thing I learned, one thing that helped me, one thing I want to improve • Facilitator poses guiding questions: 'How did your community help you learn?' / 'How did you help others?' (Bangura, 2005; Waghid, 2005) • Oral only — no written requirement; translanguaging actively used **Co-Evaluation of Programme (15 min)** • Learners and facilitator together discuss what should stay, change, or be added — reflecting co-create principles (Lubicz-Nawrocka, 2022) • Resources: Circular seating arrangement, facilitator prompt cards in Chichewa and English	**Type: Formative / Authentic Assessment** Facilitator records key observations from reflection circle for programme review Learners' co-evaluation responses inform curriculum improvement (action research spiral — Biggs & Tang, 2007)	• Honest and specific self-reflection on own communication and record-keeping • Constructive peer feedback offered during circle • Active participation in co-evaluation discussion *Feedback: Verbal group feedback + facilitator summary of patterns observed across all sessions; informs next programme iteration*

ILO SUMMARY — Aligned to Constructive Alignment (Biggs & Tang, 2007) and Bloom's Digital Taxonomy (Churches, 2008)					
ILO	**Full Learning Outcome Statement**	**Bloom's Level**	**Sessions Addressed**	**Assessment Method(s)**	**Theoretical Grounding**
LO1	Recall and explain key vocabulary and concepts related to market trading, basic banking, and financial communication in both Chichewa and English.	Remembering / Understanding	1, 2, 3	Observation, peer teaching, oral chants	Freirean problem-posing; Bangura (2005) — oral storytelling as cognitive practice
LO2	Demonstrate polite spoken English and translanguaging strategies to negotiate prices and communicate effectively with peers in simulated market trading interactions.	Applying	2, 3, 5	Market role-play (formative); community market simulation (summative)	Translanguaging — Zondi & Mbatha (2025); Ubuntugogy — Bangura (2005)
LO3	Apply functional literacy and numeracy skills to complete basic financial tasks such as calculating costs, recording transactions, and interpreting banking information.	Applying / Analysing	4, 5	Banking simulation (formative practice); community market simulation (summative)	Andragogy — need to know & real-life orientation (Ngozwana, 2020); Sichula & Genis (2019)
LO4	Evaluate their own and their peers' communication and record-keeping skills through a collaborative simulated community trading activity, identifying strengths and areas for improvement through reflection.	Evaluating / Creating	5, 6	Peer observation checklist; Ubuntu reflection circle; co-evaluation discussion	Ubuntu philosophy — Waghid (2005); Co-create curriculum — Lubicz-Nawrocka (2022)

ASSESSMENT PLAN OVERVIEW — Fairness, Validity, Reliability, Inclusivity & Cultural Sensitivity	
Assessment Principle	**How It Is Addressed in This Programme**
Constructive Alignment	Each ILO is directly activated through a specific activity and verified through a corresponding assessment task. Learning outcomes, teaching, and assessment form an integrated system rather than separate parts (Biggs & Tang, 2007).
Fairness & Equity	Oral and performative assessments replace written tests, which would disadvantage low-literacy learners. Assessment tasks reflect real-life roles (market trader, banking client) familiar to all learners (Bangura, 2005; McArthur, 2022).
Validity	Assessment tasks test exactly what was taught. The community market simulation (Session 5) tests LO2 and LO3 through authentic performance, not proxy tasks. Criteria are co-constructed with learners to ensure cultural meaning (Biggs & Tang, 2007).
Reliability	Facilitator observation checklists are applied consistently across sessions. Structured peer-observation templates reduce subjectivity. Multiple data points (facilitator notes + peer feedback) triangulate evidence of learning.
Inclusivity	All assessment tasks accommodate diverse literacy levels — no single written test. Translanguaging is explicitly allowed and valued in all assessed tasks. Ubuntu-aligned peer support during assessments is encouraged, not penalised (Waghid, 2005).
Cultural Sensitivity	Assessment criteria are co-constructed with learners in Chichewa and English. Oral storytelling, role-play, and community simulation reflect the learners' lived cultural practices rather than Western academic conventions (Bangura, 2005; Sichula & Genis, 2019).
Improvement of Teaching & Learning	Facilitator observation notes are reviewed after each session. Learner co-evaluation in Session 6 directly informs future programme iterations. This mirrors the action research spiral — continuous reflection, adjustment, and improvement (Biggs & Tang, 2007; Lubicz-Nawrocka, 2022).

Note: Assessment is constructively aligned to ILOs following Biggs and Tang (2007). Bloom's Digital Taxonomy levels follow Churches (2008). Communal, oral, and performative assessments reflect Ubuntu philosophy (Waghid, 2005) and translanguaging practice (Zondi & Mbatha, 2025).
Table formatting drafted with Claude (Anthropic, 2025), based on my entire assignment.
